

Delivery Policy

Delivery Attempts

A delivery agent may make up to three delivery attempts. If delivery is unsuccessful after the final attempt, the shipment may be returned to the sender.

Tracking

Customers can use the shipment tracking number to view the latest recorded delivery status.

Delivery Delay

When a shipment is delayed, customers should check the tracking status first and contact customer support if the status does not change within the applicable service window.

Delivery Instructions

Customers should provide an accurate delivery address and a reachable contact number to reduce delivery failures.
